Re: **Docket No. E-00000XX-13-0214**

Chairman Stump and Commissioners,

Thank you for the opportunity to comment on this topic. Weatherization and Energy Efficiency are extremely important programs to my community, and I appreciate the chance to inform you of the benefits we've realized from them.

The need in our community for assistance programs, such as weatherization, is substantial. More than 96,000 households in Tucson are eligible for weatherization.¹ While the Great Recession has ended, the economy is not yet back to where it was before the crisis. Although the ratio of job-seekers to available jobs has decreased from its peak in 2010, half the people who are willing and able to work are unable to find employment.² Locally, 1 in 4 children in Arizona are in poverty, with even higher rates in Maricopa and Pima counties.³

The energy burden of the population we serve is significant. Energy burden, or the income spent on utilities as a percentage of total income, is much larger for low-income populations than for the population at large. Generally, an energy burden of 6% is considered affordable;⁴ limited-income communities in Arizona have an energy burden of 17%.⁵ These extreme energy burdens result in critical trade-offs made in family budgets: children in poverty who don't receive energy assistance experience a significant decrease in nutrition,⁶ and rates of adults who need medical care or prescription medication but couldn't afford it have shot up in recent years and remain above pre-recession levels.⁷

With so much need, weatherization has been a lifeline for our communities. As you know, weatherization entails improving a residence's building envelope, making the home energy efficient, repairing or replacing appliances and addressing health and safety issues. This program is able to cut utility bills by a third, saving hundreds of dollars annually and bringing down energy burdens to a manageable level.⁸

Thousands of homes have been weatherized in Arizona in the past few years,⁹ with hundreds in the City of Tucson alone. These improvements couldn't be realized without the coordination of federal and utility weatherization programs, with a third of all weatherization funding from ratepayer-funded programs.¹⁰ If weatherization or the Standards that provide it are altered, revised, or revoked every two years, it will be a severe hindrance to our ability to continue to provide this valuable program.

The Energy Efficiency Standard has kept utility bills lower for all ratepayers, and it's provided funding for weatherization, improving the lives of thousands of low-income Arizonans. Please protect and maintain this valuable and effective standard.

Sincerely,

Terisha Ellis
